

SYSTEM OF RECORD

Who is on the platform

COACH LIBRARY

Programs, days, workouts, exercises

PROGRAM PK id slug unique name durationWeeks 1 -- * Week / Cycle / Enrollment	PROGRAM WEEK PK id FK programId weekNumber 1 -- * ProgramDay	PROGRAM DAY PK id FK weekId dayNumber notes partCount 1--* Session 1 -- * DayOption	DAY OPTION PK id FK dayId workoutId label Gym Home trainingLocation	WORKOUT PK id name ex source catalog t restTimer* certi updatedAt stamp
WORKOUT EXERCISE PK id FK workoutId FK exerciseld sortOrder sets reps restSec notes	EXERCISE PK id name videoUrl tags archivedAt library	SET PHASE PK id FK workoutExerciseld HOLD REPS BURNOUT TIMED	WORKOUT LOG PK id FK userId workoutId performedAt progress catchUpForDate	TEMPLATE / C WorkoutTempla WorkoutCycle + paste onto progr

NOT JEREMY'S LIBRARY

Bring Your Own Workout -- same shape, other tables

BYOW EXERCISE	BYOW WORKOUT	BYOW LINE + LOG
PK id FK ownerUserId name description tags Never written to Exercise	PK id FK ownerUserId name exportText (exact paste) source notes 1 -- 1 ByowSourceNote	ByowWorkoutExercise FK workout+exercise ByowSourceNote rawText line-for-line ByowWorkoutLog durationSec names Report tab reads logs Mon-Sun PT

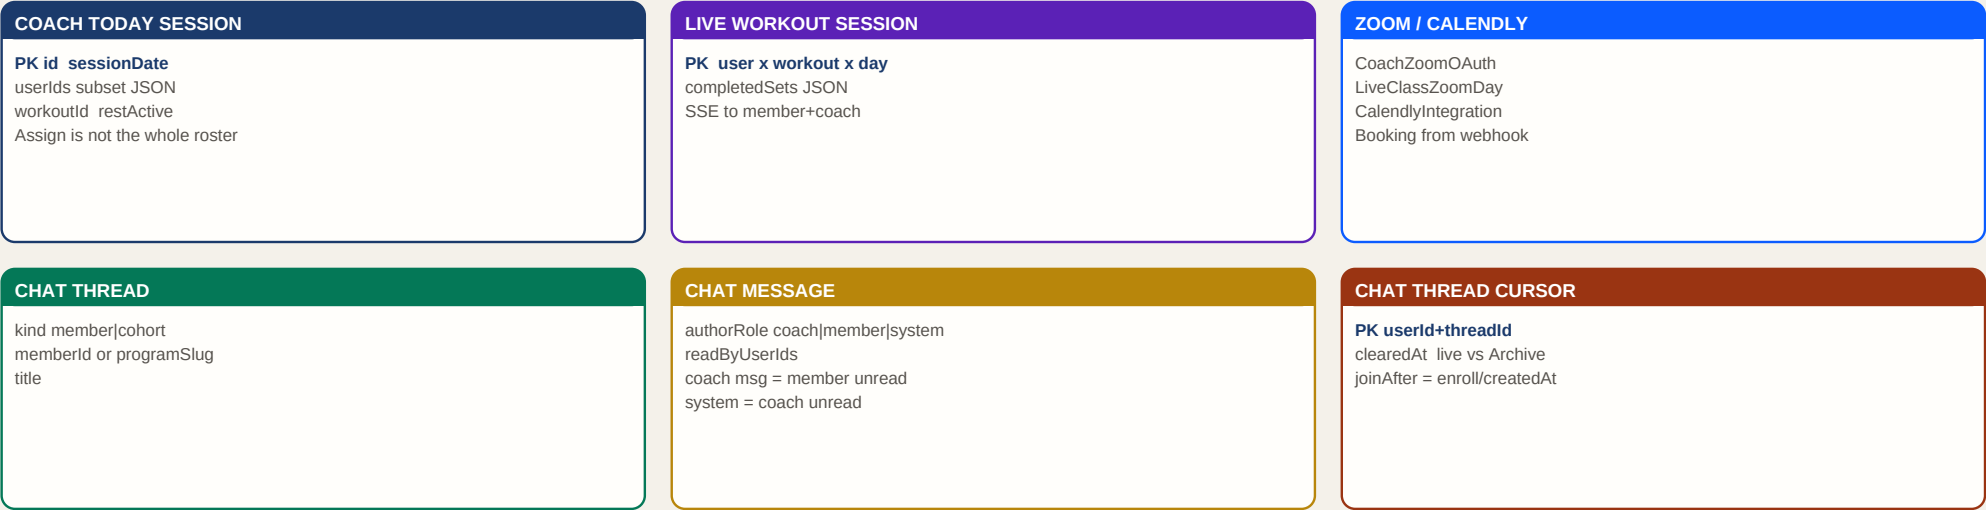

Same Postgres (train-station-catalog). Isolation is tables, not a second Supabase project.

Signup: completeMemberSignup({ channel: 'byow' }) -- User + MemberProfile, paymentNote=byow, no Stripe, no Adult enroll.

Doors: /byow/signup (public) /byow (upload) /byow/admin (John) /member/byow (Workouts | Report).

FLOOR + MESSAGES

Live session, Zoom, and 1:1 / cohort chat

JEREMY IS MERCHANT OF RECORD

Stripe, Venmo, tips, commission -- no CHD in Postgres

STRIPE WEBHOOK EVENT		
id	type	payload
idempotent		process

FACT SUBSCRIPTION PAYMENT		
amountCents	status	
plan	paidAt	userId

COMMISSION		
Partner	Payout	Line
cliff coded; brackets draft		

REFERRAL / DISCOUNT	
ReferralCode	
Stripe coupon via admin	

WAITLIST / LEADS	
WaitlistEntry	source
byow-signup vs signup-register	

ACCT BOOKS		
Entity	Account	Party
Period Journal Entry Line		

Card numbers never persist here. Checkout is Stripe-hosted. Venmo is Mark paid. BYOW is free (no payment rows).

MEMBER SURFACES

Measurements, grocery, scores, first-party analytics

USER MEASUREMENT tapes photos identity	GROCERY ApprovedGroceryFood MemberShoppingList + Item	GAMIFICATION Event SeasonScore Promo Prize Audit
ANALYTICS SESSION sessionKey landingVariant utm device userId?	ANALYTICS EVENT page_view page_click pagePath /byow section	CONTENT / SEO LandingMediaSettings SiteSeoSettings SiteVideoAsset
EQUIPMENT Equipment UserEquipment ExerciseEquipment	NOTIFICATIONS OutboundNotification SmsLog + DeliveryEvent CoachInboxItem	AUDIT EVENT actor action entity

HOW THE ROOMS CONNECT

One User, two catalogs, one money rail

User -- MemberProfile -- Enrollment -- Program -- Day -- Option -- Workout -- WorkoutExercise -- Exercise

User -- Booking <-- Calendly webhook User -- CoachChatThread (1:1) -- Message

User -- ByowWorkout -- ByowWorkoutExercise -- ByowExercise User -- ByowWorkoutLog -- Report

User -- WorkoutLog (Jeremy catalog only) User -- AnalyticsEvent

Stripe Checkout --> WebhookEvent --> paymentStatus=paid on MemberProfile

Venmo --> Admin Mark paid --> same paymentStatus

ChatThreadCursor.clearedAt splits live vs Archive per user; cohort joinAfter hides pre-enroll history.

91+ tables in public schema after BYOW logs. RLS on; Prisma as postgres (not PostgREST).

OUT OF THE DATABASE

Rails, cookies, and drafts

NOT TABLES

Stripe CHD (hosted Checkout)
Vercel Blob binary (images, short video URLs stored)
Session JWT cookie · ts_landing A/B · ts_byow
Calendly/Zoom as vendors; tokens in CoachZoomOAuth

DRAFT / NOT CODED

Partnership tax brackets \$5k / \$15k
BYOW \$2.99 SKU (this door is free)
Twilio SMS still parked
Second Supabase project for BYOW (tables instead)
