

PRINT AND TAKE TO STRIPE DASHBOARD

Stripe PCI wizard -- filled answers

Not signed. Not an attestation. Paste these answers into **Dashboard** → **Settings** → **Compliance documents**, then Jeremy signs **there** if Stripe asks. Merchant of record: Jeremy's Train Station **LIVE** Stripe (not John's personal account).

A. Integration -- copy as-is

Question	Answer	Why
How do customers pay online?	Stripe Checkout -- hosted redirect to checkout.stripe.com	/api/stripe/checkout creates a Session; browser leaves our site.
Elements / Payment Element / card fields on our page?	No	No CardElement or PaymentElement in the app.
Raw card numbers posted to our API?	No	Never.
Store PAN, expiry, or CVC?	No	Postgres stores Stripe customer / subscription / Checkout session IDs only.
Card-present / Stripe Terminal?	No	
Staff types cards into the Stripe Dashboard as a normal way to take payment?	Never (confirmed 13 Sep 2026)	Routine Dashboard entry would force SAQ C-VT. Do not start.
Which SAQ should Stripe pick?	SAQ A	Hosted Checkout. If wizard says A-EP or D, stop -- misclassified.

B. Other money -- say this if asked

Question	Answer
Other ways people pay?	Venmo @JeremyByrdCSCS then coach Mark paid . Not card data.
BYOW / notes app?	Free . No Stripe. Out of card scope.
Tips?	Stripe Checkout (same hosted page).
Refunds?	Stripe Dashboard / admin refund API (Stripe IDs only).
Connect marketplace yet?	Not yet. If Connect stays hosted Checkout, still SAQ A -- revisit then.

C. SAQ A eligibility -- all Yes

- Card-not-present only (e-commerce). **Yes**.
- All account-data handling outsourced to Stripe (PCI Level 1). **Yes**.
- We do not store, process, or transmit account data electronically. **Yes**.
- Stripe is PCI validated -- download their AoC from the same Dashboard page. **Yes, once that file is saved**.
- Paper card numbers? **No** (Jeremy must not write PANs on paper).
- Website only redirects to Stripe Checkout -- no card form on our origin. **Yes**.

D. Merchant block -- confirmed vs write-in

Field	Value	
Legal name	Jeremy Byrd / The Train Station	confirmed
DBA	The Train Station	confirmed
Website	https://www.thetrainstation.co	confirmed
Stripe account	LIVE Train Station (Jeremy merchant)	confirmed
Business type	Fitness coaching / online memberships	confirmed

Field	Value	
Who signs	Jeremy Byrd -- merchant of record. John does not sign.	confirmed
Card tx / year	Well under 20,000 (Level 4-ish)	write number if asked
Company address	_____	write
City / state / ZIP	_____	write
Business phone	_____	write
EIN / tax ID	_____	write -- not SSN on this sheet
Date signed	_____	write

E. After you paste this into Stripe

1. Download **Stripe's AoC** and the **Shared Responsibility Matrix** from that page.
2. Save them next to PCI-SAQ-A-Draft-2026-09-13.pdf on the Desktop.
3. Do **not** run ASV scans unless Stripe or the bank requires them (later).

F. Do not answer Yes to

We collect cards on our website · We use Stripe.js v2 · Staff types cards into Dashboard as the normal take-pay method · We store full card numbers · We have in-person terminals.

If the wizard says SAQ A-EP or D, stop. The live app is Checkout redirect -- fix the classification; do not sign the wrong form.
