

How The Train Station works today

One site. Four rooms. One Postgres. Jeremy coaches; the app holds the floor.

Brand trim is emerald green (was gold) · 13 Sep 2026

UNDER THE FLOOR

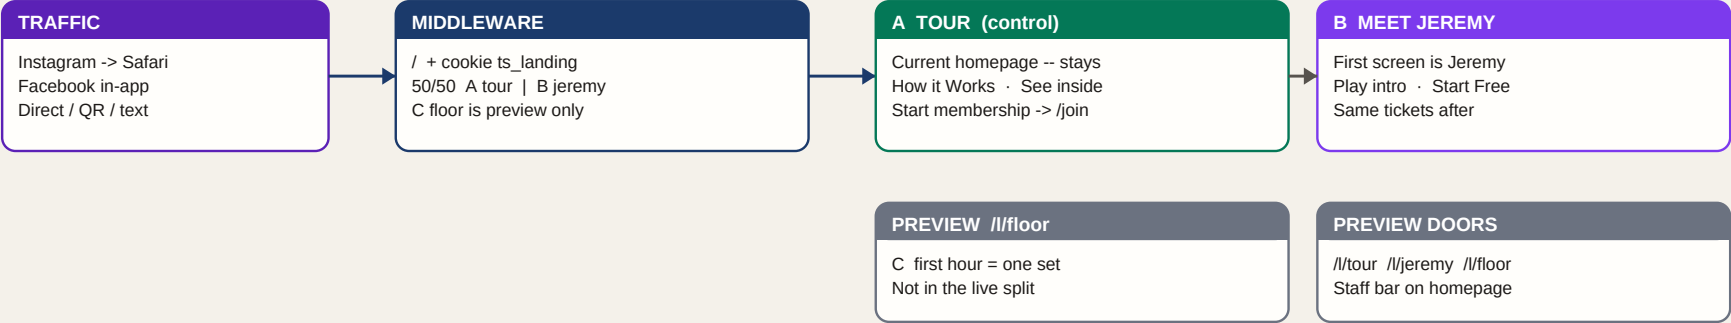

Read this pack left to right

Page 2 Guest journey and landing A/B. Page 3 Tickets, checkout, onboard, 15-min intro.
Page 4 Member app. Page 5 Coach app. Page 6 Live class + workout. Page 7 Money. Page 8 Data. Page 9 Loop tests.

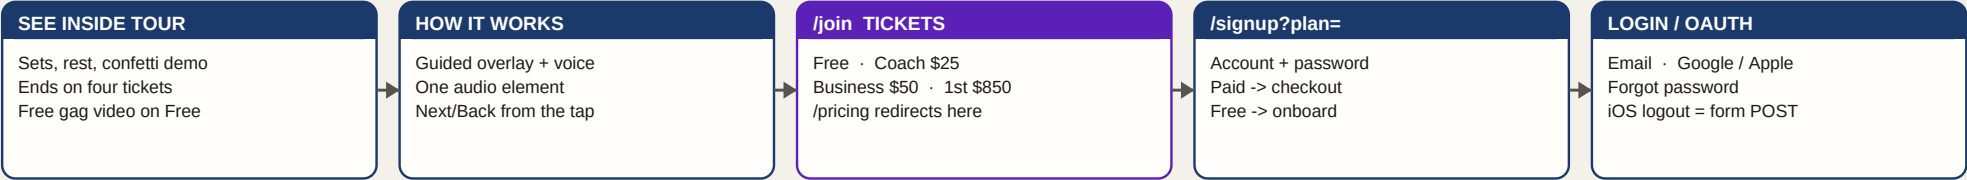

THE DOOR

Jeremy posts thetrainstation.co. The site splits the room.

Members skip the experiment and land in the app. Staff always see A (current homepage). Guests get a sticky cookie.

ONCE THEY ARE INSIDE THE PUBLIC SITE

What the analytics already told us (do not forget)

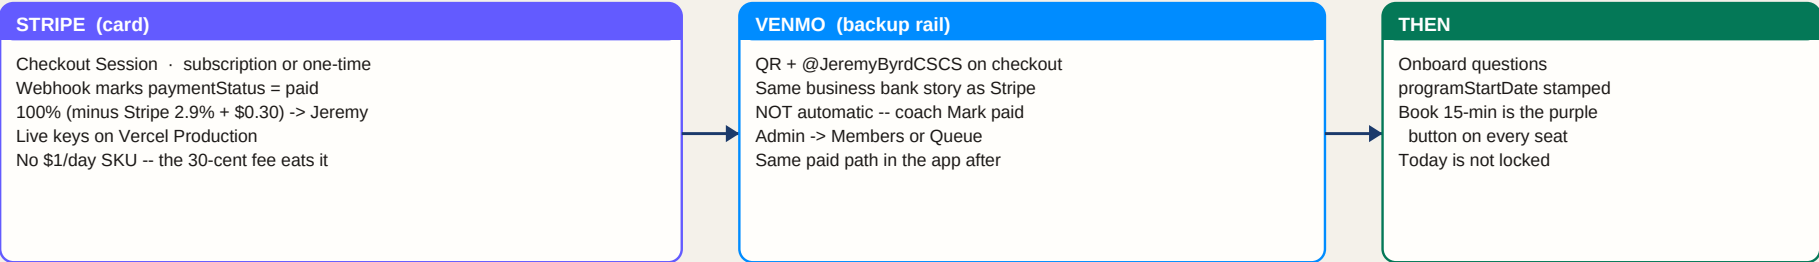

Homepage is the storefront (~80% of guest sessions). Bounce is the leak, not the app.
Fri 11 Sep = Instagram to Safari (blank referrer). Wed 9 Sep = Facebook in-app (FBAN).
One post URL hits the A/B door. Tour curiosity is not conversion.
Join and Signup ping-pong. Free explorers wander unless they book Jeremy.
Kill switch: LANDING_AB_ENABLED in src/lib/landing-ab.ts. Live arms: tour + jeremy. Floor stays //floor.

THE FOUR SEATS

Pick a ticket. Paid seats hit checkout. Free is a lead, not a product.

FREE EXPLORER \$0 Lead so they can know Jeremy No Stripe Onboard + 15-min pester Today still opens	COACH CLASS \$25 / mo Subscription · Stripe LIVE Or Venmo + Mark paid 3-day trial is checkout-only Personal 28-day Adult month	BUSINESS CLASS \$50 / mo Subscription Quick maintain extras Same intro booking Silver trim on purple	1ST CLASS \$850 once One-time · not monthly 8 x 1-hr private / 30 days Emerald trim (was gold) Full site access
---	---	---	--

MONEY IN

15-MINUTE INTRO -- ALMOST MANDATORY, NOT A LOCK

BOOKING LOOP Onboard CTA = Book 15 min with Jeremy (Calendly embed). Today still opens so they can train. MemberBookIntroPester bar stays until a Booking row exists. Natasha Simmen already has an intro stamp -- no outreach. Calendly webhook writes Booking in Postgres. Coach sees it in Admin -> Bookings / Alerts. Free is a lead source so they can know the coach. Working out is personal; not knowing Jeremy is the barrier. Do not email, SMS, or chase Natasha. Leave Free. Internal Calendly backfill is OK.
--

ONCE THEY HAVE A SEAT

The member app is a phone floor. Logo is Home. Today is the work.

TOP · LOGO = HOME

Logo -> landing / home
 No house icon on Today
 Join strip when class is live
 (compact, right side)
 Text size in Account
 Sign out = form POST 303

TODAY

Personal 28-day month
 Not the gym calendar
 Day wheel + workout
 Fasted cardio = 35 min

MESSAGES

1:1 with Jeremy
 Unread badge
 Open during pending pay

SCORES

Points / leaderboard
 Confetti on finish
 Emerald +N celebrate

GEAR

Equipment shop
 Amazon links
 Home vs gym filter

MORE

Measure (tapes + photos)
 Partners (Eco Delight)
 Book Call (Calendly)
 Account (tier, tips, logout)
 Nutrition desk in header

NUTRITION

Breakfast / Lunch / Dinner ideas
 Shopping list -- two-column phone checklist
 Trainstationize against Jeremy's cleanse table
 Coach edits Admin -> Grocery list
 Book a nutrition appointment (Calendly)

GATES

Payment pending -> checkout
 (Messages / Book / Account open)
 Intake pending -> onboard
 Intro not booked -> pester bar
 Live class -> Join / Ping Coach

TODAY -- THE ACTUAL WORKOUT

DAY WHEEL

Their month, not Adult gym
 Today chip = emerald
 Catch-up allowed

WARM-UP GROUP

Timed block
 Not restacked as slot 1
 Cool Down is its own slot

SETS

Check a set -> rest
 Rest = restActive only
 Buzzer = transient

TIMED WORK

Fasted cardio 35:00
 One timer, not 3 sets
 Podcasts stay ambient

DONE

Confetti + points
 Day stamp
 Scores update

JEREMY'S DESK

Plan the day. Put people on it. Coach live. Edit the catalog when you must.

ADULT CALENDAR BUILDER -- WHAT BROKE AND THE RULE NOW

0-30 / 30-60 COLUMNS

Jeremy's mouse: click a slot, add Cool Down / Meal Prep, delete -- the last exercise used to jump to the top.
Cause was column math + pin-on-load, not the Cool Down name. GET no longer re-pins. Delete leaves a hole. Add fills the clicked slot.
5+4 rebalance used to grow the left column and jump items. Left width is locked; extras grow the right only. Blur saves the focused card.
Do not compact PATCH on assignSlot. Do not restack on save. Cool Down is not a warmup. Meal Prep can sit after Cool Down.
Video: Sept 12 fixes.mp4 · shipped ebd57bd and follow-ups.

WHEN JEREMY IS ON THE FLOOR

A class is a subset of the roster. Unassigned members stay on their own month.**AUDIO -- COPY THE WORKING IMPLEMENTATIONS. DO NOT INVENT A SECOND PLAYER.****Hard rules while this is live**

Never hot-poll Postgres faster than 5 seconds. Idle screens: one GET, SSE, refresh on tab-focus. Rest-timer 200ms tick is local UI only.

Always use Postgres for product state. Blob/JSON is migration debt. Binary media (images, short video) may live in Blob; URLs + fields still in Postgres.

John & Steph live class pick: john@lemonvoice.com + sprealty9@gmail.com. Do not auto-select the whole roster on Assign.

ONE BUSINESS

Stripe and Venmo both fund Jeremy's Train Station. John is not a second merchant.

TODAY (coded)

Member pays -> Jeremy's master Stripe (or Venmo)
Company keeps the feed
Dev & partnership fees are NOT at swipe
Software cliff: 5% of MRR until \$5k, then 30% of all MRR
Fee pool must hit \$400 before Run payout
John = 100% of fee pool until partners change
Admin -> Dev & partnership + Connect Express (later)

DRAFT PARTNERSHIP (not coded, not signed)

Tax brackets on Gross MRR:
first \$5k always 5% to John
\$5k-\$15k always 30%
above \$15k always 50/50
Contract: docs/partnership-drafts.../10-Partnership-Agreement-DRAFT.pdf
Not legal advice. Recode Admin after counsel.
BYOW (\$2.99 app, \$10 Jeremy week) stays preview.

TICKETS VS FEES

KEEP

Coach Class \$25 / mo (the goal)
Business Class \$50 / mo
1st Class \$850 one-time
Tips \$5 / \$10 / \$25 / \$50

DROPPED

\$1 / day -- Stripe \$0.30 eats it
10 cents a minute
Three buy-button SKUs
\$10 / week as a live SKU

PARKED

Twilio SMS (Messages exists)
BYOW platform (preview doc)
App Store later
Supabase still Free -- backups!

Do not

Put a second merchant secret on Vercel for John. Assume checkout auto-splits to John's bank. Treat Venmo as a different company.
Grant landing_free_week unpaid. Skip the 15-min book as if Free were the product. Post //jeremy -- post thetrainstation.co only.

SYSTEM OF RECORD

PostgreSQL (Prisma) is the app. Everything else is a rail.

USER role coach / member plan + paymentStatus programStartDate quick-auth / session	PROGRAM Adult / Strength / ... weeks + days + slots Home vs Gym templates / paste	WORKOUT exercises + sets warmup / cooldown timed hold (35 min) logs + catch-up	ENROLLMENT personal 28-day month Day 1 = Adult W1D1 Todd exception Day 2 location home/gym

13 SEP 2026 SWEEP

Gold is gone. Links hold. Workflows that need a coach password were gated.

EMERALD SWEEP

--ramp-gold token is now #10b981 (emerald)
1st Class trim, tickets, tour CTA, score +N
How it Works, confetti, inbox chips, set-done
Coach dashboard CTAs, day-wheel Today chip
Amber warnings (forgot password, resume strip) stay amber
CSS class names still say gold; they render emerald

SITE LOOP SWEEP (prod)

Pages probed: 87 · bad: 0
Public APIs: 9/9
Process-flow APIs (401 unauth): 17/17
Dead hrefs: 0
Landing A/B loop: 39/39 pass · A+B split · C excluded · doors sticky
Landing -> paid loop: 94 pass / 1 fail · fail = desktop got B headline (A/B working)
Coach-auth full-site loop: login skipped -- prod password not in env; admin routes 307 to /login

SHIPPED THIS WEEK + THIS PACK

Landing A/B · intro pester · iOS logout form POST · Today without house icon
Fasted cardio = one 35-min timer, ambient music, buzzer at the end
Adult calendar: Cool Down in the clicked slot; delete leaves a hole; left column width locked
Partnership draft PDF + \$15k brackets (not coded). BYOW stays preview.
Emerald ships on main with this pack so the live site matches the flowchart.

If you only remember four arrows

1. Post hits / -> A or B -> ticket -> checkout or Free onboard -> book 15 min -> Today.
2. Jeremy plans a class -> assigns a subset -> Zoom -> checkoffs. Everyone else stays on their own month.
3. Card money lands in Jeremy's Stripe. Venmo is the same company after Mark paid. John's share is later, not at swipe.
4. Postgres is the truth. Don't poll it. Don't steal the phone's podcast. Don't restack Jeremy's columns.
